

AEROSPACE AND DEFENCE EQUIPMENT SUPPORT

At AACE we care. We care about our team of over 40 experienced consultants drawn from all areas of aerospace equipment support. But we care even more about our clients. At AACE we don't just want to win custom, we want to keep it. That's why we take a long-term view of how best to meet our clients' needs. Every thing we do at AACE is focused on just one thing - creating unrivalled value for our customers - not just once, but again and again.

To achieve this we select the best people, people who know your business and are as committed to excellence as we are. A key element of repeatable success is quality, and that is why our processes are ISO 9000 certified. At AACE we also understand the importance of continuity, so high staff turn over and short-term hiring is something you won't find here. We work hard to develop and retain our staff to serve you better. We want our team to be your team.

AACE is a highly capable consultancy house, able to support even large projects. But we are still small enough to care passionately about what we do. Put simply, AACE is sized to deliver. We avoid the overheads and rigid processes of our larger competitors, factors that often suppress value and stifle creativity. At AACE we are capable, agile and affordable; value and creativity abound.

If you believe we can help your organization, we would be delighted to hear from you to discuss your specific requirements. You can be certain of one thing - we care about your business.
