

## **ENGINEERING & LOGISTICS**

AACE has an in-depth knowledge of all aspects of engineering and support activity ranging from operations at the front line through to the creation and management of large Integrated Operational Support (IOS) packages.

### ***Support Services***

AACE is able to provide a wide range of services that will enhance and develop support procedures, that covers:

- Detailed engineering support.
- Development of modifications including Urgent Operational Requirements (UORs)
- Extraction of maintenance and reliability data
- Development of support policies
- Liaison with other stakeholders within the support environment, to aid development of best practice
- Independent support to contractual negotiations with potential support contractors.

### ***The Service***

AACE can provide services that either take on a specific task, or to provide a supplement to the clients own resources.

The skillset available allows AACE to address both technical & logistics tasks, from the straightforward data gathering processing, right through to high value-added analysis, investigations and advice on strategy.
