

STUDIES & INVESTIGATIONS

The skills and capabilities available within AACE mean that we are well placed to undertake all manner of one-off studies and investigations. Almost any aspect of defence activity can be covered but a particular emphasis is given to engineering, airworthiness and acquisition.

The Service

Many of the studies undertaken by AACE have been very small in nature but, some of the more recent or significant ones are listed below:

- Merlin Recovery of Configuration Control study.
- Move of Hercules IOS from Lyneham to Brize Norton study.
- Nimrod MRA4 RTS Process study.
- Statement of Operating Intent and Usage (SOIU) Process study.
- MAOS Applicability study.
- Chinook Mk 2 Air Transportability study.
- DSDA study into supply UARTs
